

## **GGI to Showcase Its Newest Glass Solutions at GlassBuild America**

From decorative and life-safety to environmentally friendly glazing

**Secaucus, NJ – August 15, 2018**—GGI will be showcasing its complete range of glass solutions and fabrication capabilities at GlassBuild America, September 12-14 in Las Vegas. From decorative glass to picture frame and museum glass, all-glass entrances and shower enclosures to fire-rated glazing, along with the company's new bird-friendly glass.

"At GGI, we have a "Can Do" attitude within our organization. And, as we continue to expand not only our product range and fabrication capabilities, we continue to upgrade and add new equipment that will result in greater capacity and shorter lead times. Our goal is to provide the glazing industry with unlimited options, positioning our customers—and our customer's customer to more effectively meet the needs of the architectural and design community." says, Brad Thurman, Vice President Sales and Marketing.

### ***Environmentally Friendly Back-Painted Glass:***

The glass industry will be able to preview more than 20 new back-painted glass colors. These durable, water-soluble colors are applied to ultra-transparent low iron glass resulting in the purest color representation. The colors can be added to our custom acid-etched designs for a more dramatic aesthetic.

### ***New Glass Marker Boards: Magnetic and Non-Magnetic***

Magnetic or non-magnetic marker boards: the choice is yours. These custom designed marker boards are available single or double-sided for added functionality. Using Alice®, our direct-to-glass printing, we can include any custom logo, design or color scheme imaginable.

### ***Ornilux® Bird Friendly Glass***

As bird friendly glass continues to grow in demand, GGI is expanding its portfolio to include Ornilux, which provides bird protection combined with transparency and energy efficiency.

### ***Fire-Rated Glazing***

From Pyran Platinum® fire-protective to Pyrobel® fire-resistive and fire-rated doors and framing, GGI will display fire-rated glazing systems designed to support fire prevention and life-safety.

#### **About GGI**

For five generations, the Balik family has responded to the changing needs of the flat glass industry. From architectural and decorative glass, to picture frame glass and specialty glass. GGI sources globally, fabricates locally and distributes nationally. Offering an unmatched selection of quality glass options, we aim to deliver what the market wants in patterned, fire-rated, anti-reflective, antique mirror, custom-color back-painted glass and Alice®—the digital printing on glass process we pioneered in North America. Continuous investment in precision fabrication technology keeps us at the forefront of the most complex execution of ideas in glass. You can count on GGI not only for contemporary ideas and creative solutions, but also for the integrity, reliability and intimacy that comes from working with a family business. *When we say we know glass from the ground up, we mean it. To learn more visit [www.generalglass.com](http://www.generalglass.com) or email us at [info@generalglass.com](mailto:info@generalglass.com).*
